Developing a Legally Defensible Curriculum

March 9-10, 1998 / Albuquerque, NM

On February 28, 1989, the U.S. Supreme Court held that a municipality can be held liable for constitutional violations resulting from the municipality's failure to train its employees.

In the development of curricula, a disciplined and systematic approach is required to ensure that employees conform to basic legal principles and have the necessary skills to serve and protect the public. This course presents the need for developing curricula and delivering training that addresses the legal issues facing a trainer and administrator in criminal justice agencies.

After completing this course, you will be able to

- define the costs of lawsuits and litigation in training and failure to train,
- determine the training goals and objectives of the agency,
- use the 17 steps in training and development design,
- discuss the issues surrounding trainer liability,
- use a selection process for instructors, and
- develop and validate tests.

Course tuition: IACP Member $285, Nonmember $385
